IT professional experienced in supporting users and managing large device fleets, with strong Tier 1–3 escalation skills and end-to-end issue resolution. Skilled in endpoint lifecycle management and maintaining high uptime, with clear communication and discretion.

EXPERIENCE

IT Technician — Sendblue, Brooklyn, NY

Sep 2025 – Jan 2026

- Provided Tier 1–3 technical support across hardware, software, and infrastructure for 50+ employees, serving as a primary escalation point for complex issues
- Managed provisioning, configuration, and full lifecycle support for 4,500+ infrastructure-connected endpoints
- Documented multi-stage configuration workflows and 15+ SOPs for provisioning, incident response, and escalation, improving consistency and reliability.
- Performed root-cause analysis, troubleshooting, and corrective actions to maintain 99%+ system uptime
- Coordinated with internal teams and external vendors to resolve hardware, software, and service-related issues
- Managed inventory, asset tracking, and procurement, ensuring accurate lifecycle records and availability

Math Teacher (EdTech) — Queens Technical High School, Queens, NY

Aug 2023 – Sep 2024

- Supported and maintained classroom technology for 150+ users
- Implemented digital learning and collaboration tools across 12 classrooms, partnering with educators
- Evaluated and supported multiple educational software platforms, improving usability and adoption by ~20%

General/Operations Manager — Stand Up Cafe, Brooklyn, NY

Jan 2021 – Aug 2021

- Managed POS systems and daily IT operations, processing 200+ transactions/day
- Maintained 99.5% system uptime across two locations, reducing operational errors by 30%
- Coordinated vendors and resolved technical issues impacting business continuity

EDUCATION

Queens College, CUNY — M.A. Computer Science

2025

Macaulay Honors College, CSI, CUNY — B.S. Mathematics

2023

Primal–Dual Circle Representation (Graph Theory)

Aug 2022 – May 2023

- Conducted in-depth research on planar graphs, circle packing, and dual graph representations
- Analyzed and evaluated computational approaches to graph modeling and abstraction
- Presented technical findings to faculty and peers, demonstrating clear technical communication
